Breeze Memorial Service

Create a Lasting Memory of Your Loved One

Our History

Breeze Memorial Service noticed there was a gap in the market for a local independent company to help Funeral Directors with support services. Funeral Directors, crematoriums and ministers were being asked by families to have images and memories shown at their loved one's service, but they didn't know how to do it.

We at Breeze Memorial Service are now able to fill that gap. We're able to turn families favourite photos, music and memories of their loved one into memorial videos to be shown at funeral services, thanksgiving services or even just to keep as a keepsake.

Since starting Breeze Memorial Service, our range of services has grown from just making memorial videos to a much wider range of services. Our services now range from Live Streaming and Videography of services to designing Order of Services and even producing Service Presentations. For more details on our services please check out our website.

Throughout all of our services our top priority is to support and care for the families we help. We're here to provide practical support through our services but also a listen ear during one of the most difficult times of your lives. Breeze Memorial Service are here to help families

Create a Lasting Memory of Your Loved One

Video Tributes

Losing a loved one can be a very distressing and upsetting time.
We can help make that time a little easier.
We can transform your favourite pictures and music into a reflective video to be played during a funeral, memorial or thanksgiving service, or simply to keep.

Photos – Digital photos are preferred in JPEG or PNG format. However we can scan in original photos if required.
(We reserve the right to not add any photo into the video where the resolution appears poor)

If dates and information are required with photo's, information will need to be provided to us in writing.

Music – Music will be edited to the length of the video. If more than one piece of music is required for a video, music will be edited appropriately.

Format – Videos will be saved to a Memory Stick.

Breeze Memorial Service

Create a Lasting Memory of Your Loved One

Video Tributes

We would advise that a date and time is set when we can meet with the client (preferably before leaving the Funeral home.)

We are happy to meet the client in the privacy of their own home or at the Funeral home.

We will always provide 2 free edits if any changes wish to be made. After that, a 25% fee will be required.

If cancellation is made to a video order, then a 25% administration fee will be taken if production has started.

Our videos aim to tell a story from the beginning right through to the end, creating a timeline of moments with pictures. We're happy to include any wishes.

All videos will have a title screen in memory of the loved one. These videos can be themed to a time in their life.

Please contact us if you have any questions or concerns. No two clients are treated the same. Every video will have a personal touch.

LIVE Stream

When family members cannot attend a funeral service, it can be an upsetting and difficult time.

We are able to offer a wide range of services so those important people can still be involved in their loved ones service, no matter where in the world they may be.

Live Streaming of both audio and visual will make sure everyone is included in the service.

This service will be provided on a private and secure platform, where only those with a link will be able to view the service.
Live Streaming can be done in any church, graveside or crematorium service.
All live-streamed services will be kept with an on-demand service for 30 days after the funeral service.

If live streaming isn't an option we are able to film the service and create it into a keepsake and memorial video. This also allows those to be involved who are unable to make the service.

Photography

Photography is a great way of holding on to those last memories.
This is a great service for loved ones if they have planned a very special or individual service.

While emotions are running high you cannot always remember what is happening. So capturing the funeral is a great way for families to remember what happened.

We find many families book our photography service for special themed services like military funerals or special hearses like motorcycles or lorries

Copyright of all photos and video footage taken will remain with the family.

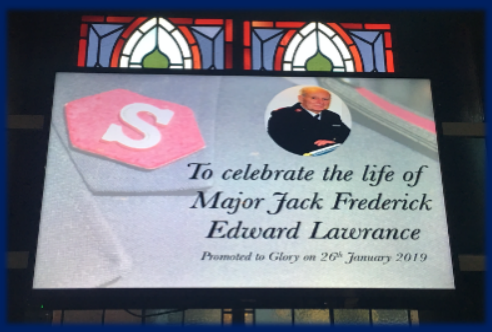
Service Presentations

Some families do not want to have to think about designing an order of service or don't want the worry of whether they have enough copies printed for every mourner to have one.

Our service presentations can take away the stress and worry of orders of service.

Service Presentations are able to have any hymn words, favourite photos, poems and memories included in the slides.



If your service venue is unable to show a presentation due to lack of AV equipment then we can also arrange that for you.

Our service presentations can be booked by either the Funeral director, Celebrant or a family member.

Service Presentations are not just limited to Funeral services.
We're more than happy to design them for any special occasion or event.

Videography

Filming a Funeral service can be a great substitute for live stream. In some service locations, it is not possible to offer a live stream.

Emotions run high on the day of a funeral service and it is not always the time and place to remember everything that is mentioned in a tribute. Now with this service, you don't have to. Filming a service gives you the ability to keep the service as a keepsake and watch back in your own time.

All our services are edited and produced on to a USB memory stick for you to keep.
All families will receive one USB but extras are available to purchase.
